

$$\begin{pmatrix} 0 & -1 & 1 \end{pmatrix}$$

$$27) \quad l_{11}^2 = 9 \Rightarrow l_{11} = 3$$

$$l_{11} l_{21} = 15 \Rightarrow l_{21} = 5$$

$$l_{21}^2 + l_{22}^2 = 50 \Rightarrow l_{22}^2 = 25 \Rightarrow |l_{22}| = 5$$

$$L = \begin{pmatrix} 3 & 0 \\ 5 & 5 \end{pmatrix}$$

$$LL^T = \begin{pmatrix} 9 & 15 \\ 15 & 50 \end{pmatrix}$$

$\therefore$

$$\boxed{|l_{22}| = 5}$$
